Gynecologic Health

A Novel Laser Therapy

MonaLisa Touch®

It's OK to talk about it.™

- "It" refers to changes in gynecologic health and it happens to a majority of women.
- As many as 50% of 64 million women are suffering from changes in their gynecologic health [1,2,3]

MonaLisa Touch

Because now you can do something about it.

A new procedure that patients have called "life-changing".

- Gentle fractional CO_2 laser therapy
- Clinically proven to bring lasting relief
- Thousands of women successfully treated since 2012
- Overwhelmingly positive and immediate results

The reason for talking about the MonaLisa Touch.

Minimal side effects

No downtime

Lasting results

Simple and Safe

The MonaLisa Touch difference matters.

3 treatments of less than
5 minutes each

In-office procedure

Requires no anesthesia

Thousands of women successfully
treated since 2012

MonaLisa Touch®

as many as

2 out of 4

Postmenopausal Women[1,2,3]

are suffering from changes
in their gynecologic health.

But they don't have to.

MonaLisa Touch®

Clinically Proven
to bring lasting relief.

A study was done by Dr. Stefano Salvatore*, Department of Obstetrics and Gynecology, Vita- Salute San Raffaele University to assess the feasibility of fractional $C0_2$ laser in the treatment of 50 women suffering changes in their gynecologic health.

- Overwhelmingly positive and immediate results
- Highly statistically significant improvement in symptoms after first treatment
- 42 patients (84%) showed significant improvement in their physical and mental quality of life scores over baseline and were satisfied with the treatment. Gynecologic symptoms were significantly improved.
